

X5000 MicroController Based Monitoring System

AVAILABLE FROM
NEPEAN ELECTRONICS

NEPEAN Power is a proven leader in the supply and manufacture of quality engineered solutions, products and technologies. Established in 1994, through the commitment of our dedicated team we have become a supplier of choice.

The X5000 features a 3.5 inch TFT touchscreen with an easy-to-navigate menu that enables users to set data sampling period, alarm threshold levels and delay times on a channel-by-channel basis or across all channels.

The system will accept voltage or 4-20mA inputs and can be used to monitor many different types of sensors. AC outputs are available via door-mounted BNCs for easy analysis. Modbus and remote PC monitoring available as options.

Applications

- Vibration monitoring and logging
- Any sensor-based design e.g. temperature, pressure, vibration, torque, voltage/current/power

Technical

Analogue input channels	12
Sampling resolution	12 bit
Sampling speed	Up to 250KHz
Screen	3.5" (89mm) TFT Touchscreen 480 x 320 x 24 bit colour
Sampler buffer	12 x 100 samples
Operating voltage	100-240VAC
Alarms	12 (user-configurable alarm level and alarm delay)
Enclosure	GRP
Dimensions (enclosure only)	350 x 250 x 200mm
Dimensions (including brackets)	395 x 250 x 200mm

Options

- Modbus TCP/IP
- PC connectivity for remote monitoring and data logging
- Alarm beacon
- Internal-mounted display and BNCs for IP65 protection
