IES2010-2GS (2 Gigabit SFP + 8 100M copper Ports)

NEPEAN Power is a proven leader in the supply and manufacture of quality engineered solutions, products and technologies. Established in 1994, through the commitment of our dedicated team we have become a supplier of choice.

Features

IES2010 series are 10-port 100M/Gigabit unmanaged industrial Ethernet switches.

The series include two types of products and offer multiple ports, such as:

- 100M fiber ports and
- copper ports as well as Gigabit SFP slots.

They also adopt DIN-Rail mounting or wall mounting, which can meet the requirements of different application scenes.

The input power supply is two independent power supply circuits which can ensure the normal operation of the device when one power supply fails.

Hardware adopts fanless, low power consumption, wide temperature and voltage design and has passed rigorous industrial standard tests, which can suit for the industrial scene environment with harsh requirements for EMC.

It can be widely used in smart grid, railway transportation, smart city, safe city, new energy, aerospace, intelligent manufacturing, military project and other industrial fields.
